## Attachment A: Chunking

### from “*How to Motivate Your Child For School and Beyond*”

In this exercise you will identify the steps involved in doing an assignment or project and how to do each part. Knowing all the different parts that go together to do an assignment or study is very important. In the table below are the key steps in doing an assignment or project. At each step you need to allocate your time and briefly describe how you will do it.

Steps involved	Time to do	Brief description of what you will do	✓
<i>Understand the question/task</i>	<i>5 mins</i>	<i>Read question carefully; take note of key words like 'compare', 'contrast', or 'discuss'</i>	✓
<i>Break question into parts</i>	<i>15 mins</i>	<i>List sections of assignment by themes relevant to the question</i>	✓
Identify what you already know or have completed			
Initial search for information (eg. Internet, library etc)			
Focused and detailed reading of books and other resources collected			
Detailed summary of information			
Organise information (eg. put information under each heading)			
Write first draft			
Tie up loose ends (eg. a bit more reading)			
Write second draft			
Edit (eg. spelling, grammar, formatting checks)			
Final draft			
Reward yourself for completing the assignment			

**As you can see, there are many steps to completing an assignment or project. When you get it clear in your mind what you need to do for each part you are more likely to stay on track and do better.**

## **Attachment B: Anxiety (Preparing for tests) from “How to Motivate Your Child For School and Beyond”**

Students who are well prepared for tests tend to be less anxious leading up to them and also less anxious while they are doing them. Too often students don't prepare effectively for tests. This has the effect of increasing their anxiety leading up to and during the test. Remember, there are lots of ways to prepare – eg. through study, looking at past papers, diet, and relaxation. In this exercise you will look at ways you can better prepare for tests. In the table below, tick the boxes you feel you need to pay particular attention to. Put this checklist on your wall at home, in your diary, or somewhere you will see it leading up to a test or exam. At the end of this list, add three more items.

<b>Tick which items you need to pay special attention to – then add 3 more</b>
<input type="checkbox"/> Start your study early in term and do it regularly – but remember that late study is better than no study
<input type="checkbox"/> Develop a study timetable and stick to it
<input type="checkbox"/> Hand in all work on time
<input type="checkbox"/> Look at past test papers; set your own test; hand in practise mini-essays (say, 250 words) regularly
<input type="checkbox"/> Write down the distractions that can arise leading up to an exam (eg. part-time work, friends). How will you deal with these?
<input type="checkbox"/> Avoid making major life decisions before a test
<input type="checkbox"/> Keep your relationships intact leading up to test
<input type="checkbox"/> Avoid the panickers leading up to and just before the exam. Also, avoid people who might unsettle or distract you in any way
<input type="checkbox"/> Try to get good sleep in the week leading up to the exam
<input type="checkbox"/> Not too much caffeine and a balanced diet in the week leading up to the exam
<input type="checkbox"/> Leading up to the week of the test, try to do a bit of exercise to burn off excess anxiety
<input type="checkbox"/> Practice your relaxation every day (see the previous exercise)
<input type="checkbox"/> Look for teacher clues (material repeated in class; teacher says ‘this is on the test’; teacher asks class to take detailed notes)
<input type="checkbox"/> Know the following: (a) material to be covered in test, (b) % of term/year mark allocated, (c) time allowed, (d) venue, (e) types of questions (multi-choice, essay, short answer, true/false etc), (f) marks for each section/question, (g) materials allowed in exam room
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>

## **Attachment C: Anxiety (Taking tests) from “*How to Motivate Your Child For School and Beyond*”**

Test taking is a skill that can be learned. This skill significantly reduces anxiety you feel leading up to the test and while you are doing the test. In this exercise you will look at ways you can improve your test-taking skills. In the table below, tick the boxes you feel you need to pay particular attention to. Put this checklist on your wall at home, in your diary, or somewhere you will see it the night before a test or exam. At the end of this list add three more items.

<b>Tick which ones you need to pay special attention to – then add 3 more</b>
<input type="checkbox"/> If you're a heavy sleeper, set two alarm clocks (out of reach from your bed) the night before the exam
<input type="checkbox"/> Have all your materials ready the night before (including a watch)
<input type="checkbox"/> Have breakfast
<input type="checkbox"/> Arrive at the venue early
<input type="checkbox"/> Avoid the panickers before the exam. Also avoid people who might unsettle or distract you in any way
<input type="checkbox"/> If you're easily distracted by other students, sit close to the front of the exam room (if you're able to)
<input type="checkbox"/> Read instructions <u>very very very</u> carefully
<input type="checkbox"/> Know what marks are awarded to the test, how many sections/questions, allocate your time at the start
<input type="checkbox"/> Look through the test paper so you know what's ahead
<input type="checkbox"/> Read questions <u>very very very</u> carefully – <u>underline</u> key words
<input type="checkbox"/> For long answers, look back at the question frequently – this keeps you on-track
<input type="checkbox"/> Pace yourself – know how much time is available for all the questions
<input type="checkbox"/> For longer answers (eg. essays), spend 1 or 2 minutes at the start to sketch a quick answer plan
<input type="checkbox"/> Take no notice of other students in the exam room
<input type="checkbox"/> If you don't know the answer to a question, don't freak out; go onto another question and go back to the difficult question last – sometimes the answer comes to you as you're doing another question
<input type="checkbox"/> Know which method of test taking suits you (but be flexible depending on the exam): Do you prefer (a) working from the beginning to the end of the paper? (b) doing the easiest questions first? (c) doing most difficult questions first?
<input type="checkbox"/> Write neatly
<input type="checkbox"/> Use all the time available – if you finish early, check your answers
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
